Insert a micro SD Memory Card

You must insert a micro SD memory card into the car DVR before you can start recording. Please use a Class 6 or above micro SD memory card with 2GB, 4GB, 8GB, 16GB, or 32GB capacity.

1. Insert a micro SD memory card into the appropriate card slot on the car DVR.

Note: Always format new memory cards in the car DVR before using them for the first time.

2. To remove the memory card, push to eject it out of the slot.

WARNING: Do not remove the memory card during shutdown to avoid damages to the memory card and loss of recorded videos.

Install the car DVR camera

1. Peel off the protective film from the foam sticker of the car DVR camera. Insert the mount bracket into the top of the car DVR camera.

2. Mount the car DVR camera behind the rear-view mirror.

3. Connect the car DVR camera to the lighter socket of your vehicle using the ACC power adapter.

Note: Insert a micro SD memory card before connecting the car DVR camera to the lighter socket of your vehicle.

WARNING: Lighter sockets of some types of vehicles will still supply power after the car engine is turned off. If your vehicle is of this type, please unplug the car DVR camera from the lighter socket to avoid unnecessary power consumption and unexpected issues.

Install the FinalCam app

Developed specifically for Android devices and iOS devices (iPhone/iPad), the free download FinalCam App allows you to wirelessly preview real-time videos, control the functions of the car DVR camera, and play videos directly from your smartphone or tablet.

When you first use the car DVR camera, download the app FinalCam from the Google Play Store (for Android devices) or from the Apple Store (for iOS devices), then install it on your device.

Connect to the car DVR camera using Android or iOS devices

1. After the car DVR camera is powered on, press the switch button. When the red light flashes, Wi-Fi is turned on.
2. Turn on Wi-Fi on your Android or iOS device, then tap

DVR-HX*** from the listed Wi-Fi networks. Enter the password 12345678.

Note: When your device is connected to the car DVR camera via Wi-Fi, the connection to the Internet on your device isn't available.

Use the FinalCam app on Android or iOS devices

After the FinalCam app is launched while the car DVR camera is connected, the screen will be displayed in landscape view.

You can preview real-time videos, play videos, download videos, delete videos, or export videos to a computer.

Transferring files to a computer

To transfer files between the micro SD memory card and your computer:

Option 1:

Take the micro SD memory card out of the car DVR camera, then insert it to a compatible card reader to transfer files to your computer.

Option 2:

Insert the micro SD memory card into the car DVR camera. Connect the car DVR camera to a computer using a USB cable.
